CITY COUNCIL HOLDS MEETING

The new city council is down to work. Monday evening the first business meeting was held under the new regime and the manner in which the city's affairs were handled gave assurance of a satisfactory administration.

A most important feature of the session was embodied in a letter received from W. J. Dingee in which that gentleman offers the city the means of acquiring a permanent and adequate water storage plant by building at his own expense a reservoir on some portion of the elevated part of his property and donating the site and reservoir to the town. Mr. Dingee's letter is as follows:

George A. Merrill, Esq., Chairman of Board of Town Trustees, Redwood City, Cal.

Dear Sir: I am informed that the people of Redwood City have commenced proceedings for a bond issue to provide funds for the purchase of several steel tanks to be erected in that city, for the improvement of their water supply. While I recognize the fact that the installation of these steel tanks will improve the present water system, yet I believe I can make the people an offer, which if accepted, will not only obviate the purchase and erection of these steel tanks, (which besides being unsightly structures, will be only of temporary value,) but will be a permanent reservoir and will supply sufficient water for years to come.

If the people of Redwood City are so minded, I am willing that they select a suitable site on the hills in my property there, and I will construct thereon, at my own expense, a concrete reservoir of a capacity exceeding that of the proposed tanks, and will deed the site and the reservoir to the city, absolutely.

All the necessary pipe and pipe lines to properly connect this reservoir with the system at Redwood City are, of course, to be supplied by the city, and they are to extend the present town water system so as to include the property belonging to me at Redwood City.

This proposed reservoir can be supplied by the present pumping system or from any other source that may be available. If it is hereafter found that the present source is inadequate to supply the needs of the city, I will agree to furnish whatever water may be needed from my present reservoir and storage system back in the hills, up to its capacity, which is about 200,000 gallons daily, at 7½ cents per 1000 gallons, to be delivered at the reservoir site so to be selected.

Trusting that this matter will receive the favorable consideration of the Board of Town Trustees, I am, Yours very sincerely,

Yours sincerely, W. J. Dingee.

The letter was referred to the committee on public utilities for consideration

Mr. Steinberger appeared before the board and informed it that a meeting of the citizens had been held Saturday evening, for the purpose of protesting against the removal of the long distance exchange from hereto Palo Alto, at which meeting a committeeof which he was one was appointed. It also desired that a committee from the board of trustees be appointed to co-operate with the citizens committee in voicing the desires of the town, but as the telephone company had agreed to change the long distance exchange back as before and the matter has been amicably arranged there was no need for any action.

He then introduced Mr. H. Keyser, division superintendent of the telephone company who said that the trouble resulted from a misunderstanding; that the company does not want to injure this city or its citizens but that it was its aim to better the service by centralizing the business, thus placing the long distance switching in the hands of on operator so that service could be more rapid. Chairman Merrill informed Mr. Keyser that he was glad that the matter had been settled, but he hoped the company would make no more changes without notifying its patrons.

The contract between the town and the Gas & Electric Company expires May 10, it was agreed with Superintendent Newbert of the company that the present contract be extended sixty days to cover the absence of Manager Britton.

The consideration of the matter of street improvement was continued to May 18, and the specifications for the work referred to the street committee for correction.

Trustee Beeger reported that he had conversed with Mr. Hosmer, accountant of the Spring Valley Water Company regarding a system for keeping water accounts, and that gentleman had promised to prepare a system that would be accurate and suitable for this city.

Chairman Merrill informed the board that he had been speaking with Mr. Gleason of the Spring Valley Company and that gentleman was inclined to allow the testing of this city's meters with those belonging to the company and known to be accurate.

The matter of preparing specifications for street sweeping and sprinkling was referred to the street committee.

Marsal Christ was directed to compare the readings of the city meter and that belonging to the water company and report at the next meeting.

Mr. Cumberson called attention to several leaks in the water pipe along Roosevelt avenue, and said that a tap in one of the hydrants has been left running for hours and a good deal of water allowed to go to waste.

Superintendent Dickey stated that the pipe leaks were caused during the improving of the avenue and the contractor had agreed to make the repairs.

The committee of Public Works was instructed to have the floodgates put in order and the superintendent of streets was directed to use them at short intervals.

A petition was received from residents along Roosevelt avenue, asking that the avenue be sprinkled the same as other streets in the city. Also that the property owners along the avenue be required to put in the curbing. It was referred to the committee on streets.

Company Will Pave Street

A conference was held Friday night last between the Finance Committee of the Board of Town Trustees and property owners on the right-of-way of the Southern Pacific and an abstract of the company's deed was present and read, showing the status of the company in occupying Pennsylvania and Railroad avenues through the Diller and Hancock additions in this city. After discussing the situation, a committee was appointed consisting of Chairman Merrill of the Trustees, H. F. Butts and J. W. Poole.

These gentlemen visited the railroad office in San Francisco Saturday and in a short time succeeded in securing a promise from the company that the avenues would be graded and macadamized from the creek, near H. F. Butts' place to Pine street, and would be open to traffic. A driveway of about fifteen feet in the clear will thus be constructed along the tracks allowing entrance and egress to property abutting upon the railroad right-of-way. By this peacable method a settlement of a question was secured that otherwise might be a cause of friction between the citizens and the railroad company in the future.

Patrons Enter Protest

The announcement given out last week that the telephone company had concluded to abolish the long-distance central office and have all outoftown calls go through Palo Alto caused a storm of protest among the businessmen, culminating in a mass-meeting at the town hall Saturday night, presided over by Guy P. Hull, president of the Board of Trade. Those present expressed themselves strongly against the change on the ground that it would result in a much more unsatisfactory service, and in the end a committee was appointed to meet with the city council the following Monday evening and jointly demand that the old plan be restored. The movement was successful as will be seen by reference to the report of the council meeting in this issue. The company's officials gave assurance that in making the charge they believed it was for the best interests of all. Since it was not satisfactory it would not be continued.

NYAL'S Spring Sarsaparilla

There's no better Spring Tonic made than Nyal's Sarsaparilla. Its just the right combination of herbs and iodides to put the human system in the finest condition after the "slowing up" of winter.

We know the ingredients, and know how it is made. That's why we recommend it so heartily. The iodides are the greatest of all blood purifiers; it has senna and mandrake to act on liver and the sarsaparilla is reinforced with good old fashioned herbs that never fail.

Architect Glenn Allen presented the following report concerning extra work to be done on the dome of the newcourt house. He explained that it was overlooked on the original plans. To make the dome substantial the work had to be done andthe cost would be a little less than $10,000. Chairman Coleman said he was not familiar with the proposed change and desired time to look into the question. He made the order that action on said report be deferred to MondayMay 11 and in the mean time the District Attorney was directed to investigate the legal phase of the question.

To The Honorable Board of Supervisors,

San Mateo, Calif

Gentlemen:

I beg to report to you that upon stripping the base of columns to the old dome of Court House that there is no anchor bolt or rod securing the steel frameto the foundation or no wind bracing of any character in frame of dome, thus leaving the entire dome and frame thereto free to vibrate and sway in the wind or earth quakes.

I therefore recommend that the following extra work be done: That the dome and frame thereto be raised and supported on jack screws; that the old foundation to the dome be taken down seven feet from base of columns and that 7-8 inch steel plates full size of foundation piers be bolted to base of each pair of columns supporting dome, each of these plates to be drilled for two 1¼ inch anchor rods six feet long with 6x6x½-inch plates at bottom ends and double nuts at top. These anchor rods to be built into the foundation piers when they are re-built.

The foundation piers to be rebuilt of selected hard brick, laid up in mortar composed of one part of Portland cement and three parts clean sharp sand. Each course to be grouted and brick to be thoroughly wet before being laid. The steel plates on base of columns to be drilled in four places for grouting, holes to be 1½ inch and these plates to bedded in neat Portland cement which is to set 72 hours before weight is placed on same.

That a series of double diagonal bracing b placed in the first story of dome between six pair of columns. This to consist of 7-8 inch steel gusset plates 18 inches wide connecting each pair of columns and extending 9 inches beyond columns and riveted thereto with 12 rivets in each column for each plate. These plates to be placed at the top and bottom of columns in 1st story and to be connected diagonally with 1x3 inch hydraulic forged adjustable steel eye bars, with upset ends standard turnbuckles with 12 inch adjustment. Eye bars to have split ends and be connected to gusset plates with 3inch turned steel pins, secured with cotter pins.

That a series of single diagonal bracing be put in to brace the dome longitudinally,b e put in this to consist of 1x3 inch hydraulic forged steel eye bars connecting columns Nos. 37 and 40 at floor line ofsecond story with adjacent pair of columns in dome at ceiling line of second story. Connections to be made with steel angles and gusset plates riveted to columns, eye bars to have split ends and turnbuckles as before specified.

That sixteen steel gusset plates be put in connecting columns of dome to circular beam at roof line; these gusset plates to be 3 feet by 3feet by ⅜ inch triangular in shape and reinforced with 4x4x3-8 inch all around outside edge

Angles to be riveted to platesand circular beam and bolted through columns. The bottom angle on these plates to be left off at shop and bottom edge of plate to be left blank. These holes not to be drilled til dome isplumbed and in proper position, when these connections will be made in field.

The base of old columns to be thoroughly scraped and cleaned and painted two coats of Dixon's Silica Graphite paint All the above steel work to receive two coats and the old columns onecoat of the above paint

The foregoing extra work must be done to make the old dome and its frame as substantial as the new portion of the building, otherwise it will always be a menace to the safety of the building and its occupants.

Respectfully, GLENN ALLEN, Architect.

In the matter of the incorporation of the Town iof South San Francisco, W. J. Martin and E. I. the boundary lines of the proposed incorporation could be fixed. Mr. Woodman argued forcibly in favor of having all of San Bruno Park in the incorporation. He claimed that the low land of that locality might be used fordrainage purposes. Attorney F. H. The papers presented by the people of South San Francisco asking for incorporation were reported by the District Attorney to be in proper form and on motion of Eikerenkotter the hearing on the matter of incorporation and boundaries was set for May 18, the surveyor was directed to prepare a map of the proposed town to be presented at their next meeting.

MOUNTAIN DISTRICTS LOSE SCHOOLS IN VALLEY GAIN

The marhsals appointed by the various school boards of the county to gather the census of the public school have been engaged in this work for more than two weeks past and have in the most cases completed their duties and made returns to the office of the County Superintendent ofSchools.

The result of their work brings out the fact that during the past year a general migration from the mountainous districts to the valley has taken place, the reports from the mountain sections, in most cases, showing but a small increase and in some a falling off, while the schools situated in the valley and especially in the towns show an increased attendance for the year just closing.. This fact will, unquestionably, be brought out much stronger when the returns are complete from all the larger schools. As yet no reports have been received from Redwood City, San Mateo, Colma or South San Francisco.

The office of the County Superintendent has been unusually busy for the past week or more segregating th information carried in these reports and classifying it in such a manner that it will be in available form as a source of information for the office here and also for the State Superintendent, Edward Hyatt of Sacramento, who will, from the reports sent from the varlouse ounties apportion the money from the State school fund. The greatest care is being taken by the office here that all reports shall be absolutely correct and reliable, for it is from these that the tax apportionments for both State and county for the coming year are made up.

At the recent municipal election held at Fort Jones, Siskiyou county, Dr. Al Milliken, a former Redwood City boy, was elected Trustee.

Precious Spices.

There are portions of the globe today where spices are worth more than gold or silver. "In the arctic region spices are essential to health and happiness," wrote an explorer. "A dash of pepper, a pinch of ground cinnamon, a little nutmeg or a piece of ginger root revives the jaded appetite wonderfully in the north. I have seen shipwrecked sailors fight over an ounce of spices with more fierceness than they ever did for money."

Not a Land Shark.

"I hear that you called me a land shark," said the real estate dealer hotly.

"Yes," said the customer, "and I desire to apologize for it. The lots you sold me are under water at high tide. You're really a marine shark."

However, even this concession did not seem to restore the entente cordiale.—Philadelphia Ledger.

Best Seat in the House.

Executioner—How is this? We are going to cut your head off today, and yet you are laughing. The Condemned—Yes; I was thinking how glad some people would be to occupy the seat behind me at the theater tonight.—Rire.

Henpecked.

Major (to captain of militia) — You must give your orders in a louder and firmer tone. Captain—I don't dare! My wife is watching me out of the window.—Meggendorfer Blatter.

It never occurs to fools that merit and good fortune are closely united.—Goethe.
